Learn AP Physics - AP Physics 1 & 2 - Newton's Laws of Motion

Newton's first law
states that an object in
motion tends to stay in
motion unless if acted
upon by a net force.

Read Online Ap Physics Newtons Laws Practice

This means that if friction is not being accounted for, there is no net force required to keep an object moving if it's in motion. A net force is only required to change an object's motion.

Learning Objective
(3.C.1.1): The student
is able to use Newton's
law of gravitation to
calculate the
gravitational force the
two objects exert on
each other and use
that force in contexts
other than orbital
motion. [See Science
