Biology 2 Unit 6 Flashcards - Questions and Answers | Quizlet

Unit 6: Ecology. Ecology is the study of the interactions between living organisms and their environment. As you can imagine, the study of these interactions can be both complex and very subtle. To truly appreciate ecology, the macro-level of biology, you must have a firm understanding of the micro-level of biology, biochemistry and cells, as ecology is primarily governed by the flow of energy through an ecosystem.
