Evolution Of ... **Flashcards and ...**

The process of evolution occurs only in populations and not in individuals. A single individual cannot evolve alone; evolution is the process of changing the gene frequencies within a gene pool. Five forces can cause genetic variation and evolution in a population: mutations, natural selection, genetic drift, genetic hitchhiking,

Populations Lecture

Outline. Overview: The
Smallest Unit of

Evolution. One
common

misconception about
evolution is that
organisms evolve, in a
Darwinian sense,
during their lifetimes.
Natural selection does
act on individuals.
