Four Fish: The Future of the Last Wild Food

Four Fish: The Future of the Last Wild Food is a 2010 nonfiction book by author Paul Greenberg. This work explores the state of commercial fishing and aquaculture. Greenberg frames his observations by commenting on the status of four specific fish: cod, salmon, bass, and tuna.

Four Fish - Wikipedia

Four Fish is a book about the future of fish by an angler journalist and writer, Paul Greenberg. How many fish do we need for our food, and how many are there in the sea? Paul Greenberg writes the future of human growth depends largely on how we manage our ocean, and a few basic guidelines should be followed to find a balance between human desire and ocean sustainability.
