"Memory" is a single term that reflects a number of different abilities: holding information briefly while working with it (working memory), remembering episodes of one's life (episodic memory), and our general knowledge of facts of the world...

General Psychology: An Introduction | Noba

The field of general psychology concerns itself with studying the mind. This includes cognition, perception, behavior and emotion. Psychology has been around since the time that people started to think about other people. As a discipline, however, it separated itself from regular medicine in the 1800s.
