Economic Inequality Across. Gender Diversity. The global trend towards extreme wealth and income concentration has dramatically strengthened the economic and political power of those individuals — overwhelmingly male — at the top. In the United States and around the world, women continue to be underrepresented in high-level, highly paid positions and overrepresented in low-paying jobs.

## **Gender Economic Inequality - Inequality.org**

Women have made great strides in the workplace, but inequality persists. The issue of equal pay is still a hot-button topic. The US Census Bureau reports that women earn 80 percent of what men are paid. Such inequality is hardly unique to the United States, however.

Job insecurity is an indicator of precarious work that refers to the fear of losing one's job. It is a relevant source of stress, with negative consequences on people's mental health. The main objective and contribution of this study is to identify how gender inequality and job insecurity are related, responding to the lack of consensus found in scientific literature in this field of study.
